---

Hi Katrina,

I got more questions from Fox 23 about activities at the Wilcox site. She asked similar questions of ODEQ so I will coordinate a response with them too.

Here are her questions:

I'm hearing that you're back doing testing of water wells in Bristow, OK.

What specifically are you checking for and why? What else, specifically, are you doing there, and how long do you think you'll be there?

Have you checked the nearby creeks nearby yet and done any testing on them – specifically Sand Creek?

Do you have the soil samples results from the most recent testing you've done on the site?
